Tips for a Successful Video Conference

- Review materials prior to the start of the meeting
 - Being prepared makes the meeting more productive and enables better discussion and communication among participants
- Keep yourself on mute if you are not talking
 - This helps cut out background noise and prevents interruptions in ongoing discussions or presentations
- Use the Chat feature if you have a question
 - The host will keep an eye on the chat and make sure your needs are addressed
- State your name prior to speaking
 - It's hard to recognize voices over video chat and this will help discussion by allowing other participants to address you by name to respond to your question or statement
